

We offer a variety of options for Vegetarians and Vegans

Appetizers:

Fusion Brussel Sprouts without bacon

Salads:

Any of our salads can be served without cheese and added tofu, our vegan dressings are balsamic vinaigrette, hoppy poppy, and oil and vinegar

Trail Burgers:

Any of our burgers can be served without animal products. We can do them without cheese and with lettuce instead of a bun. For the "burger" we offer the Black Bean Burger which is vegan.

Entrees:

We can substitute with tofu, for example, the Thai Curry Chicken with tofu instead of chicken. We also have the shroomzilla quesadilla that can be made without cheese. We also have marinara for pasta - however, most pasta does include egg.

Sides:

We have a variety of side for a vegan, they include: Brewhaus chips, sweet potato fries, side salads, brewhaus fries, cilantro lime rice, fresh veggie of the day, and steamed rice

Dessert:

Unfortunately, for desserts we are lacking in vegan options. Sometimes on the weekends we have dessert special that meets the requirements but there is no set option. I will make sure to say something to our executive Chef to see if we can come up with something for the future.
